

Resolving Occlusion Confusion

If the destructive forces from occlusion scare you, *you're not alone!* Exposure to complicated techniques and equipment, a profusion of philosophies, and meaningless rules intensifies confusion which prevents otherwise capable dentists from performing complex dentistry.

This course will help you **see how simple understanding occlusion is** when **broken down into its bare elements** of teeth, bones, muscles and a joint! You'll gain confidence to *solve bite problems* and use the same principles to *predict successful outcomes* whether restoring single teeth or full arches.

WHO SHOULD ATTEND

General Dentists, staff, and their specialist support team (orthodontist, oral surgeons and periodontist)

Destructive bite forces when undiagnosed create a multitude of problems within the practice and amongst their specialist partners. Relationships with patients suffer as well.

Participants will learn how to communicate more effectively to insure their patients experience the highest possible levels of oral health.

Dr. Donald Reid, DDS

Please RSVP IMMEDIATELY!

Tuition-\$395.00

Credits-8 Hours worth of CE Credits

Date-Friday, April 6th, 2012

Location-nSequence Center for Advanced Dentistry

Resolving Occlusion Confusion

PARTICIPANTS WILL LEARN:

- ◇ Recognize the signs and symptoms of Occlusal Disease and how to discuss them with a patient at the examination.
- ◇ When altering an existing occlusion makes sense.
- ◇ How teeth contacts cause TMD.
- ◇ The benefits of border positions in the front and back of the mandible.
- ◇ A simple method to differentiate intra and extra articular disorders.
- ◇ When an occlusion demonstrates orthopedic stability.
- ◇ How to alter tooth form to ensure restorative success.
- ◇ What TMJ noises look like in 3D.
- ◇ How and when to change Vertical Dimension.
- ◇ Learn to use appliances to locate, register, and capture excellent bite records.
- ◇ Several techniques to capture centric relation bite records.
- ◇ What to do and say when treating a severely compromised occlusion.

COURSE OBJECTIVES

Dr. Donald Reid, DDS

Dr. Reid is a founding Father of the Academy of Microscope Enhanced Dentistry, a graduate of the Piper Center for Temporal- Mandibular disorders, The Dawson Center for Advanced Dental Studies, the Misch International Implant Institute and a faculty club member for Spear Education.

The bedrock of his adult-only practice is fine dentistry in healthy mouths with stable bites.

Dr. Reid is the creator of **BiteFX software animations**, which depicts the destructive effects caused by malocclusions or temporal mandibular disorders. His work is a visual expression of the teachings of doctors Spear, Dawson, Tanaka and Okeson. Dr Dawson provided personal assistance to Dr. Don Reid to insure the anatomical and physiological accuracy of his animations.

This course illuminates every cause, effect, and treatment of destructive bite forces. Dr Reid's passionate style utilizes **theory, 3-D animations, and clinical examples** to help attendees gain confidence / skills in this controversial arena. As a General Practitioner that treated over two thousand destructive occlusions, **Dr Reid conveys relevant information that can be used on Monday morning.**
